

PUBLIC TRANSPARENCY REPORT **2025**

Volksbank Vorarlberg e. Gen.

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

1) Volksbank Vorarlberg e. Gen., which was founded in 1888 and is a registered cooperative owned by more than 18'700 members, is well known for its focus on responsible investments and as the first regional bank in Vorarlberg we are proud to be a long-term signatory of the Principles for Responsible Investment from the United Nations. Over the last couple of years, we have seen an increasing demand from individuals and institutional clients who want to have a focus on responsible investments. Also, many studies show that individuals and organizations are concerned about environmental, social and governance issues. Moreover, regulation will become a crucial part over the upcoming years. Because of these changes, we believe that responsible investing is not just a preference but the norm and there will be a shift from asking why to why not. Therefore, we want to support our clients in every aspect of their financial concerns and want to help our clients with an individual sustainability concept to manage their assets. Due to these changes, we implemented for our discretionary solutions our own sustainability approach "Achtsamer Investmentansatz" which can be translated with "Attentive Investment Approach".

2) Our overall approach "Achtsamer Investmentansatz" for our discretionary solutions is based on two major steps. First, we apply a filter with exclusions on single investments (e.g. single equities and single bonds). The filter is based on various criteria and includes value-based exclusions (limiting exposure to alcohol, tobacco, etc.) and norm-based exclusions (e.g. UN Global Compact, etc.). We have implemented this filter together with one of our sustainability data providers and we get a quarterly update on the requirements we have set. Second, we have set a focus on ESG integration in our investment process. For the invested funds within our discretionary solution, we get an ESG rating from two independent sustainability data providers. Thereby a fund should have at least an ESG Performance Score of 25 or an investment grade ESG-rating or be classified as article 8 or 9 within the EU regulation 2019/2088 in order to meet our sustainability criteria. Therefore, we can grant our customers that at least 90% of our investments in our discretionary mandates are compliant with our responsible investment approach.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

There has not been any major change within the "Achtsamer Investmentansatz" in the reporting year with one exception, that the negative exclusion criteria has been set made stricter. Further we have reduced the portfolio weight of an investment title, where the engagement process was finished without a positive result. In November 2024, our equity fund was awarded the FNG label including 2 stars after we submitted an extensive questionnaire on all possible sustainability topics.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

By continuously reviewing our specifications and processes, we can respond quickly to changes, and we want to keep it that way. We would like to continue to be awarded the high distinction at FNG label annually and also continue to be recertified at PRI. Each year we tackle 2-3 new engagement cases ourselves, which gives us the opportunity to improve sustainability issues in companies in which we are invested or would like to invest in the future. We plan to do the same in the upcoming years.
